

Founded in 2018 as part of the EBS student entrepreneurship program, Nutiklaas manufactures and installs smart films. We 3D print custom materials, offer electrical and smart home solutions, and provide aftercare services. Operating worldwide, we focus primarily on the Baltic and Scandinavian markets.

Nutiklaas ensures privacy with

ONE CLICK

Achieve privacy without curtains

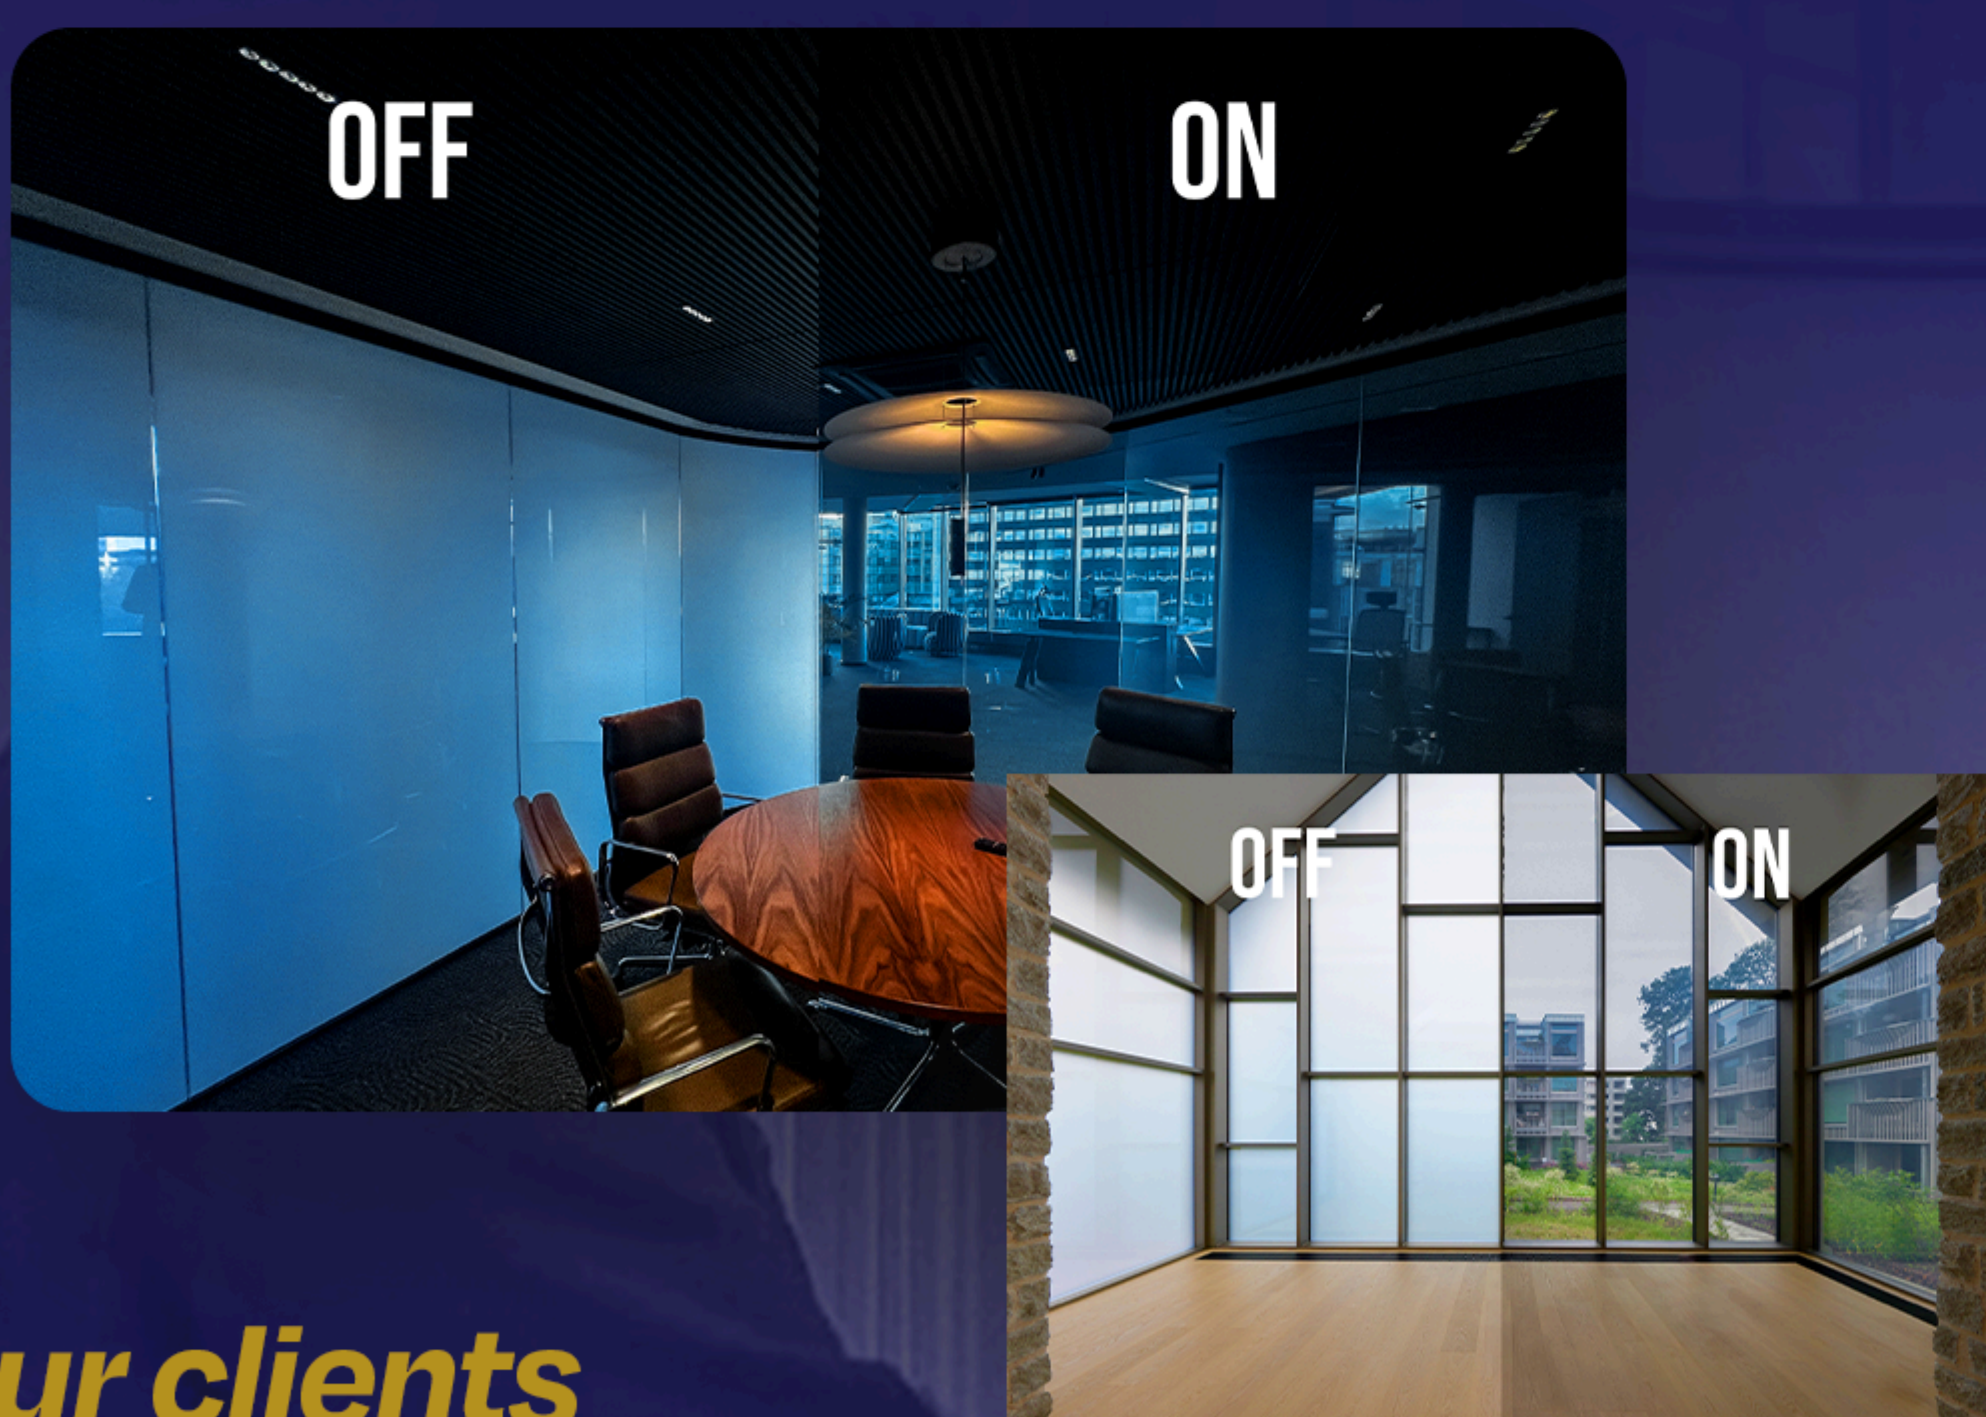

Why choose Nutiklaas smart film for your glass surface:

- * Can be installed on existing glass surfaces (windows, partitions, cars, etc.).
- * Change transparency in 0.2 seconds (remote control, phone, automation, etc.)
- * Lifetime of over 12 years, then easily removable.
- * Protects against UV rays, infrared radiation, and sun-induced contrasts.
- * Less dust and more open space (embracing minimalism).
- * Modern and luxurious interior style.
- * Usable as a whiteboard and HD projection surface.

Our clients

B2C: over 400 private houses and apartments
 B2B: Telia, Alexela, Tallink, LHV, Bolt
 B2G: Taltech, Tallinn Airport (Tallinna Lennujaam),
 Estonian Academy of Security Sciences
 (Sisekaitseakadeemia), University of Tartu Clinics
 (Tartu Ülikooli Kliinikum)

Why you should trust us:

- * Fast response time, with installation available the next day if needed.
- * We manufacture and modify smart films in Peetri, Estonia.
- * We 3D print custom modules for specialized solutions.
- * Over 1,000 unique clients and more than 7,000 m² of smart film installations.
- * We use certified electricians, film applicators, and materials.
- * Actively involved in the development of smart windows (we are also developing electricity-generating window glass and films to create zero-emission buildings).
- * We provide services worldwide and have distributors in several countries.
- * Additionally, we laminate smart films between two layers of glass in Estonia.
